As a motivated web developer and database management professional, I am seeking opportunities to expand my skill set and contribute to a dynamic company. With expertise in front-end and back-end development, as well as experience in team collaboration and problem-solving, I am confident in my ability to make valuable contributions to your team's success.

- Teamwork
- Stress Tolerance
- Problem solving
- HTML/CSS
- Flutter
- MySQL
- React.js
- TypeScript

## Université 8 mais 1945 Guelma

/ Computer science

As a second-year university student studying computer science, I am on track to obtain my bachelor's degree in July 2024.

## Personal Photography Website

- Created a responsive photography portfolio as part of my personal website.
- Incorporated PHP code into the website for uploading client or visitor photos.
- Uploaded photos are stored in a database for easy retrieval and management.
- Displayed randomly selected photos from the database on the website.

## Web-based Database Management

- Built a website that streamlined database management by enabling users to perform functions through a user-friendly interface.
- Increased efficiency of database management system by enabling insertion, update, and deletion functions through a user-friendly website.
- Demonstrated ability to design and develop efficient, user-friendly solutions to complex problems.
